

# TERRA TREE SHELTER

Award-winning, 100% biodegradable tree shelters made from certified British wood. Terra has been independently tested and certified as biodegradable in soil, marine and cold water environments, leaving no traces of microplastics or forever chemicals such as PFAS behind.

The Terra Shelter is a 100% biodegradable tree shelter crafted from sustainably sourced British-grown wood. Backed by years of research, these shelters combine FSC certified wood waste with a unique, patent-awarded design to create an eco-friendly guard that naturally decomposes over time - whether in soil, rivers or oceans.

These shelters have been independently tested and certified biodegradable in both freshwater and marine environments, ensuring they leave no harmful traces behind. They're non-toxic, PFAS-free and have earned the 'Sustainable Product of the Year' Award from Pro Landscaper and the 'Net Zero' Award from Confor.

With a typical lifespan of 5 years, the Terra supports the forestry industry and enhances the health of natural landscapes by gradually breaking down to enrich the soil.

## Benefits

- 100% Biodegradable in soil, marine and freshwater: the Terra Shelter is certified to be fully biodegradable in soil within 2 years, and independently tested to be 100% biodegradable in marine, and even in cold waters, leaving no trace behind.
- Made from 100% British FSC wood water: certified by FSC and Grown in Britain, the wood used to make Terra is taken from waste streams of British wood, diverting product from landfill to protect the trees they once came from.
- PFAS and Microplastic-free: Terra has been independently tested to be free from microplastics and forever-chemicals like PFAS.
- Optimal Tensile Strength: outperforming alternative bio-options in tensile strength, Terra is estimated to offer tree protection for an average of 5 years.
- Superior Light Transmission: more light transmissible than a conventional shelter, Terra retains 90% of its light transmission after 3 years and has been tested following ASTM D1003 (Procedure B).

Product Description	Nest Size	Shelters per Box	Boxes per Pallet
60cm Terra	4	120	18
75cm Terra	4	1000 per pallet box	-
1.2m Terra	4	60	18
1.5m Terra	4	500 per pallet box	-
60cm Terra Shrub	4	512 per pallet box	-
Terra Vole Guard	3	450	40
40cm Terra Wraparound	3	165	40
60cm Terra Wraparound	3	165	48
1.2m Terra Ventilated	4	60	18
